[Overloading And Overriding In Java Pdf](#)

**Polymorphism --changing forms of
behaviour**

```
graph TD; A[Polymorphism --changing forms of behaviour] --> B[static polymorphism -- detected by javac(early binding) Via method overloading]; A --> C[Overriding method];
```

**static polymorphism --
detected by javac(early
binding) Via method
overloading**

- 1.Can exist in same class or in inh hierarchy.**
- 2. same method name,ret type ignored**
- 3. signature - different (no/type/or both)**
- 4. No rules on access specifiers**
- 5. No rules regarding exc handling**

1.can exist only in inh hierrachy

Overriding method

2.Must have same name,same signature,ret type can be either same or sub type of the super class method ret type(co variance)

4.Overridng form of the method must either same access specifier or wider.

5. Overriding form of the method can't throw any NEW or wider checked excs.
